What we do?

Our Vision

We were built on a fundamentally crazy idea – the idea that every art is science in the making. Driving a car or flying a plane were all dreams and art, till they were simplified into systematic steps that anyone can learn. We believe to simplify, simplify, and further simplify concepts. Through such belief we believe that knowledge can be unlocked for everyone's benefit.

How we do it?

Our Approach

We strive to provide services to our clients with an emphasis on continuous improvement, proactive approach, courtesy, timely response, accuracy, and most importantly Complete Customer Satisfaction with newer technologies.

Our services are available a la carte so you can precisely get what you need. Flexibility is the key to our offerings, and at the core of this, is the spirit of innovation that we bring to our products and services

Our Offerings

Corporate Trainings

Our high-quality corporate training's programs enable your team to stay head of the competition

Jumpstart Bootcamp

Our immersive Bootcamps with internship enable our students to get more job opportunities.
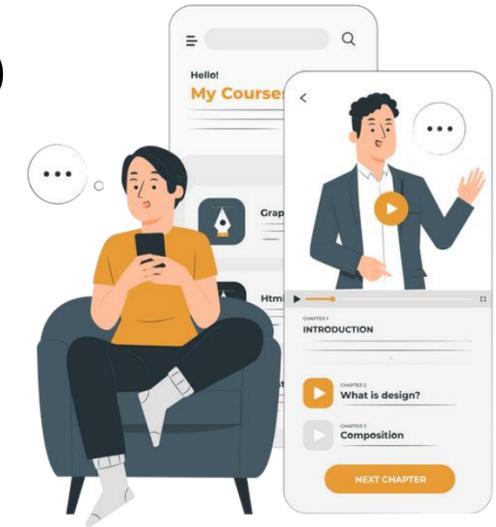

Consulting

End to End Consulting and advisory services for Data, Analytics and Cloud space.

Products

We help our client develop amazing data products changing the world one byte at a time.

Corporate Trainings

The Number Speaks for Itself!

With more than 12 years of experience in the education and teaching field, we guarantee the best service for quality corporate and individual training.

Our Partners/Clients
Testimonials

"I am very interested in further training in Machine Learning and Neural Network and would like to know which course to take next.. I would love to be in touch with Instructor in the future to get more advice"

Healthcare Practitioner

Stanford
Hospital & Clinics

"This was an excellent introductory class for a non-specialist that provided me with exactly the kind of foundation and background I was seeking. I would recommend it highly to anyone who wants to understand more about the subject or to use it as the first steps in getting into the field. "

Senior Manager

Stanford
University

"It was extremely helpful to have the beginning of the day explaining more about the background of data governance/etc. I did find that the Tableau exercise was helpful conceptually but I still don't know if I feel like I know anything about the product Overall, this was extremely helpful though"

Data Architect

Stanford
University IT

Testimonials

I thought Instructor did a great job in these difficult times. One suggestion would be to come up with a uniform plan for acknowledging questions and stick to it throughout the course. I feel like this course met my needs as a beginner to AWS and can't wait to do more labs

Data ware developer

BANK OF AMERICA

The course was very well presented. An all-day Zoom class is challenging but it was interesting. I thought some of the exercises and quizzes could be made a little more advanced or challenging, but they are good for a general audience.

Healthcare Practitioner

salesforce

"I completed the Big Data Developer and Mentorship Program. The course is very informative and interactive. A well defined plan, course contents and tracking system help us learn each component with ease and helps us stay focused."

Sreelakshmi (Java/Hadoop Developer)

Sparkcentral

Testimonials

Large bulk of information being provided in the course as well as really good in depth explanations. The practice exercises are very helpful and I will be referring to them post the class completion. I will be referring to them post the class completion.

Software Architect

UnitedHealth Group

Great intro to data science so very good foundation to start the learning journey. understanding the process of ML and getting introduced to tools like Pandas, Jupyter notebooks etc. Nice basic overview of data science, what it can do and what it means to organizations.

Director

salesforce

Run-through of all concepts .Learning the basic concept of GCP and connecting dot with my work. Simple concepts explained.. I appreciate Instructor's calm attitude and answering every question asked. Although we don't necessarily answer your questions every time

Director

CHANGE
HEALTHCARE

Testimonials

Overall the content of this training was very good and it provided all details required in slideshow. The trainer was also knowledgeable and was able to clarify the questions raised during the training.

Director

CREDIT SUISSE
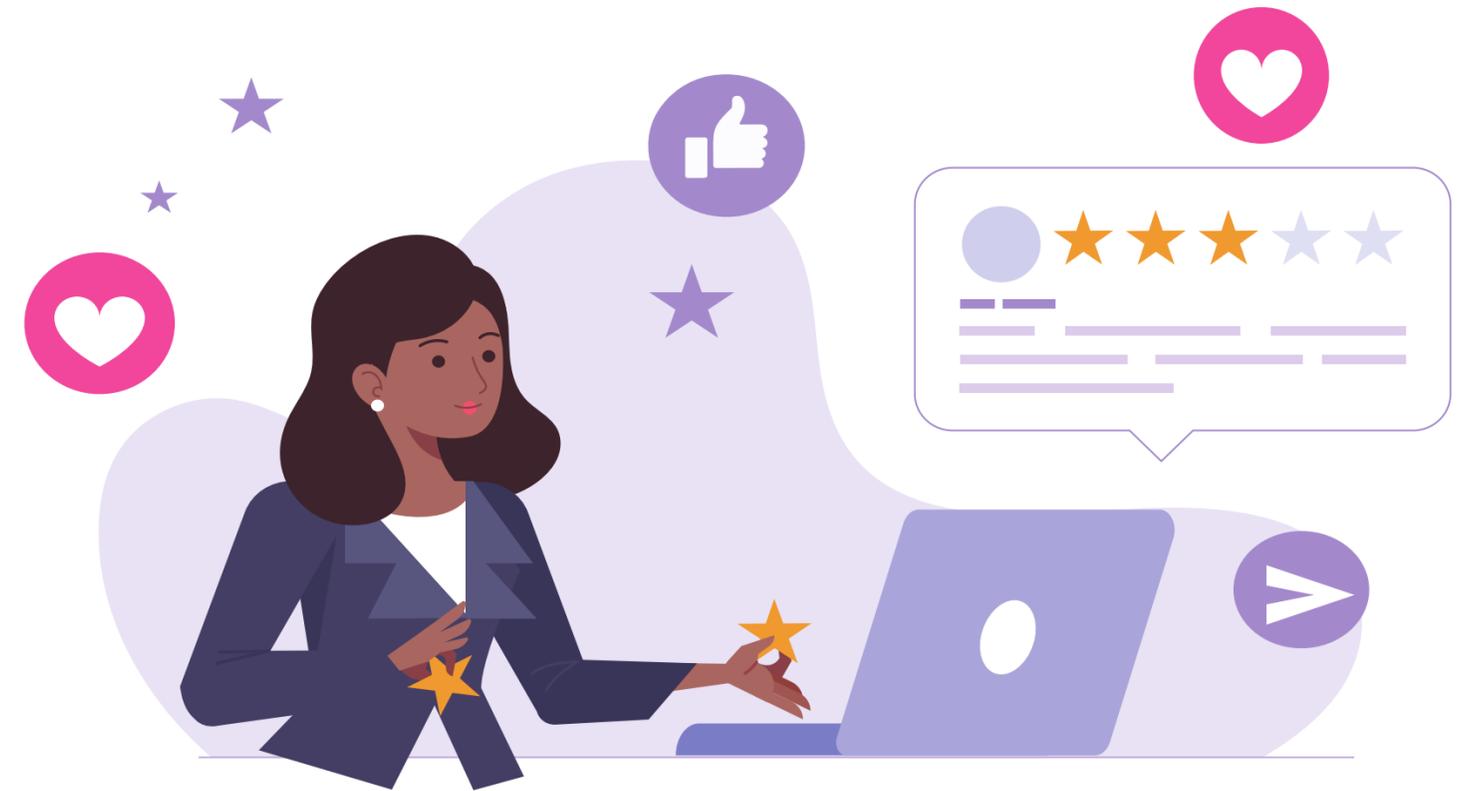

I love the way he taught Machine Learning class. He started with theory and followed up with some hands-on example of his own.. Also, he always tried to make class interactive, encouraged students to ask questions and clarified almost unlimited time if there are any questions.

Software Developer

JUNIPER
NETWORKS

A lot of ground to cover and Instructor did an excellent job of covering a ton of materials in 3 days. Truly a fantastic feat. I feel like I am equipped to have meaningful conversations with my business partners, and Data Science Partners. The 3rd day brought everything together.
